

Supplementary Table 2. Risks of ICH or SAH per 500 g increase in birth weight among women and men diagnosed within the last 10 years of follow-up

Sex	ICH			SAH		
	Number	Cases	HR (95% CI)	Number	Cases	HR (95% CI)
Women	115,514	346	0.99 (0.93–1.06)	116,859	147	0.82 (0.70–0.96)
Men	120,451	492	0.90 (0.85–0.95)	121,831	71	0.93 (0.75–1.45)

All analyses are stratified by birth cohort.

ICH, intracerebral hemorrhage; SAH, subarachnoid hemorrhage; HR, hazard ratio; CI, confidence interval.
